

Slightly different take on Fourier interpolation

Olle Hellman

*Department of Materials and Interfaces,
Weizmann Institute of Science, Rehovot 76100, Israel*

As a basis for discussion, I will highlight some technical issues that arise when Fourier interpolating quantities in reciprocal space. I will try to explain exactly where the problems appear, and explain the scheme(s) I have used to mitigate said problems. If there is interest, I can explain in more detail.
